

Alumni about KSOP

What do our alumni say who have successfully entered the German industry?

Aparajita Srivastava, from India

As the soil, however rich it may be, cannot be productive without cultivation, so the mind without culture can never produce good fruit. Fortunately, KSOP has provided us high quality education in a multi-cultural environment.

Aparajita Srivastava from India

KSOP has given me an excellent opportunity to grow up professionally and as an individual. The international program not only gave me an excellent academical instruction, but also allowed me to know and learn from other cultures.

Carlos Carrizo from Argentina

What I really liked about KSOP is meeting all those great people from all around the world. And since all the theory is worth nothing if you cannot apply it to something real I'm also very happy about the practical experiences I gained at KSOP.

Lisa Kadner from Germany

Through KSOP I was able to learn from the best minds in the world. Thank you KSOP.

Roland Ayuk from Cameroon

Karlsruhe School of Optics & Photonics

Young Talents for the German Optics & Photonics Industry

KSOP trains young talents for the Optics & Photonics industry!

WHAT IS THE KSOP?

The Karlsruhe School of Optics & Photonics (KSOP) is an international and interdisciplinary graduate school at the Karlsruher Institute for Technologie (KIT). It forms part of the German Excellence Initiative. Since 2006, KSOP offers English-taught Master's and PhD programs for and thus trains the future experts in the field of Optics & Photonics.

WHAT MAKES THE KSOP UNIQUE?

The KSOP stands out for ...

- + A multi- and interdisciplinary environment for first-class research in the field of Optics & Photonics
- + Training of highly professional young talents in close cooperation with the industry and according to its needs
- + Transfer of research results to industry applications
- + International students & alumni from over 50 different countries
- + Students with a B.Sc. in Electronic Engineering, Physics, Information Technology, Mechanical Engineering, Mathematics, Chemistry or Biology, who are expanding their training with an interdisciplinary M.Sc. in Optics & Photonics
- + An international research environment and network

BECOME A PREMIUM PARTNER AND FACILITATE THE TRAINING OF INTERNATIONAL YOUNG TALENTS FOR THE INDUSTRY.

Through your financial support, KSOP can train the brightest international minds, who stand out for...

- A KIT Master's Degree in Optics & Photonics
- Practical experience through industry internships and master theses at partner companies
- Additional key competencies through intercultural trainings and Business Culture-Workshops
- A close connection to current research and teaching, in order to strengthen future employers with regard to technical competitiveness
- German and English knowledge, as well as expertise in international markets that are relevant for your company

Your partner in recruiting: International High Potentials for your Company.

WHAT ARE THE BENEFITS FOR OUR PREMIUM PARTNERS?

- + Influence the choice of scholarship holders: Through the sponsorships, KSOP finances the studies and further education for numerous scholarship holders. With a partnership, you can influence the selection of suitable candidates and thus control the education of potential young talents for your company.
- + Present your company to potential future employees: Strengthen your employer branding through excursions and career days at your company.
- + Educate young talents according to your needs early on and tie them to your company: Gain future employees through internships and master's theses.
- + Employer Branding through professional marketing by KSOP: Benefit from KSOP's communication channels and place your company with future experts.
